

Technician (m/f/d)

for our calibration team

Nijmegen, The Netherlands

Micro Precision was founded in California in 1969. With over 35 laboratories and more than 800 qualified employees worldwide, Micro Precision is one of the leading providers of technical services such as calibration. Our success and long-standing customer relationships prove that our actions are always characterized by trust, quality, effectiveness and professionalism. These very guidelines also determine our corporate philosophy. Responsible projects and tasks ensure a varied, motivating and challenging working atmosphere in a great team.

What you can expect from us:

- You will perform calibration, testing and maintenance tasks on a wide range of measuring instruments from the fields
- You coordinate your workday very independently and are in close coordination with various internal and international contacts
- You work with highly accurate measurement technology
- Contribute to the development and improvement of measurement methods

Your skills:

- You have an electrical engineering education or are a practitioner of measurement technology
- Ideally, you have already gained some experience in the use of test equipment and enjoy working in a customer and service-oriented manner
- You are characterized by your ability to work in a team
- Willingness to travel and driving license are a prerequisite
- Good PC skills (MS Office) round off your profile
- Good English skills would be an advantage

Become part of an international team:

- Exciting and varied work with one of the world's leading measurement technology specialists
- Targeted further training and career development through internal and external training courses
- We communicate at eye level. From the intern to the managing director per DU
- Feedback is welcome: Open communication and leadership based on partnership are the foundation of our cooperation.
- As a service company, our employees are our most important asset - look forward to an open and respectful working environment and committed colleagues.

Does this sound like you? Then we look forward to getting to know you. Please send your application including your salary expectations by e-mail to:
